

Dusk Observatory Shift

Hint level 1 - HOST ONLY

1. Window

Look at earliest start, each window end and the arrival deadline.

2. Order

Read the event letters and all three witness notes.

3. Record

Start with the status field in Observer slips.

4. Signal

Look at the training cards that share one signal.

5. Food

Find the stock line and the readiness cards.

6. Final

Keep the five named results beside the final plan and find the key for each badge.

Dusk Observatory Shift

Hint level 2 - HOST ONLY

1. Window

The journey uses time as well as the job; add both to the start of each window.

2. Order

Join immediately-before pairs as a block; other before notes set the direction between blocks.

3. Record

The tag links an item to a bay; rows in separate records need not line up.

4. Signal

In an unordered pair, a word cannot be assigned by its left/right position. Use the overlap with another pair.

5. Food

AND needs every input; OR needs one. A future delivery is not current stock.

6. Final

Each badge controls a different fact, road leg, order note, pulse or habitat layer. Use the matching key exactly once.

Dusk Observatory Shift

Hint level 3 - HOST ONLY

1. Window

Check all three conditions for each window. A slot can be long enough yet start too early or arrive too late.

2. Order

Try the remaining positions, then check every note against your full order before reading the requested position.

3. Record

Keep only entries meeting every status test. Follow each printed join to the report field; do not guess from row position.

4. Signal

Give each signal a different word, check every training example and only then decode the received message in its printed order.

5. Food

Mark supported components in rounds. Stop when no further component can be marked and compare the proposed results.

6. Final

Check the completed product against all five recovered facts. If two answers remain, locate the fact that distinguishes them rather than guessing.
